Subject index

a-SiC:H 149
a-Si:H 146, 265, 269, 523, 571
a-Si:H ultrathin films 566
a-SiSn:H 571
Ab initio calculations 181, 413
Activation energies 135
Aggregation 223
AM1 method 535
Amorphous silicon 69, 146, 273, 277, 281, 305
Anharmonicity 409
Annealing 281
Annealing of a-Si:H 277
Anodized porous silicon 535
Aqueous solution 124
Assignment 245
Atomic hydrogen 168
Atomic structure 69
Au/GaAs Schottky barriers 513
Axial complexes 351

BH and AlH complexes 129
Bond-centred H defects 181
Boron 361, 503, 574
Bubbles 259

c-silicon 231
C–V and DLTS techniques 231
Cadmium 320
Carbon 365, 417, 574
CdHgTe 550
CdTe 550
Channelling 335
Charge state of hydrogen 365
Charge states 85
Chemisorption 429, 518
Cluster method 413
Complexes 21, 135, 295
Crystal surface 518
Crystalline and amorphous silicon 98
Crystalline semiconductors 33
Crystalline silicon 105

Damages 188
Dangling bonds 69, 181, 227
Decomposition 45
Deep defect 561
Deep-level passivation 3
Deep levels 540
Defect passivation 561
Defect structure 325
Defects 201, 231, 235, 545
Dephasing 447
Deposition 574
Desorption of hydrogen 497
Diatomic hydrogen 3
Diffusion 21, 85, 98, 105, 129, 146, 201, 240
Diffusion model 135
Diffusion of H^+ and H^0 135
Dimerization 45
Dislocations 285, 553
Dispersion 146
Dispersive diffusion 523
Displacement field 259
Dissociation 457
Dissociation energy 135
DLTS 365
Donor level 135
Dopant neutralization 421
Dopants 305
Doped amorphous silicon 574
Dry etching 201
Dynamics 33
Dynamics of hydrogen 320

Electrolytic hydrogenation 124
Electron energy loss spectroscopy 487
Electron energy loss spectrum 436
Electronic level 417
Electronic metastability 69
Electronic properties 436
Electronic structure 295, 429
Electroreflectance 557
Elemental semiconductors 168
Ellipsometry 566

Energy barriers 295
Enhanced oxygen diffusion 115
Enhanced quantum mechanical effects 33
EPR (electron paramagnetic resonance) 155
Equilibration 69
Equilibrium sites 168
Etching 45, 481
Extended defects 218

Field effect transistors 397

GaAlAs 540
GaAs 235, 285, 335, 397, 409, 557
GaAs(1 1 0) 436
GaAs(1 1 0) surface 487
GaAs surface modification 513
GaAs/GaAlAs heterostructures 561
GaInAs 421
GaP 245
Germanium 335
Gettering 553
Grain-boundaries 469
Growth 69

H_2^* 197
H^0 and H^+ species 129
H-chemisorbed Si 535
H complexes 371
H-implantation 235
H_2 passivation 507
H-passivation in GaAs 413
H–Be pairs 409
H–Si pairs 409
H–Sn pairs 409
HgTe 550
Highly doped silicon surface 503
Hopping 365
Hydrides 457
Hydrogen 320, 540, 545, 553
Hydrogen activation 351
Hydrogen complexes 223
Hydrogen content evolution 149
Hydrogen diffusion 69, 277, 421
Hydrogen-dopant complex dissociation 3
Hydrogen effusion 105
Hydrogen implantation 273
Hydrogen in GaAs 392
Hydrogen in semiconductors 21
Hydrogen induced defects 3
Hydrogen microstructure 305
Hydrogen passivation 351
Hydrogen-related defect 155
Hydrogen vibrations in silicon 253
Hydrogenated amorphous semiconductors 105
Hydrogenated amorphous silicon 105, 141, 227
Hydrogenation 188, 421, 557
Hyperfine structure 33

Implantation 188
Impurity complexes 351
In situ analysis 566
In situ Kelvin probe 523
Infrared 245, 566
Infrared absorption spectrometry 281
Infrared spectroscopy 351, 447
InP 397
Interface charges 557
Interface defects 507
interfaces 469
Interstitial D_2 molecules 240
Ion implantation 155

Kinetics of dissociation 365

Lasers 397
Lattice defects 417
LDA calculations 392
LEC growth 383
Lifetime 447
Light-induced effects 227, 265
Local vibrational mode 245
Local vibrational modes 413
Loops 285
Low-angle neutron scattering 141

Magnetic resonance 507
Magnetron sputtering 571
MBE 540
MBE-GaAs 561
Metastability 33, 197, 265
Microsplits 285
MOCVD-grown layers 550
Molecular dynamics simulations 98
Molecular hydrogen 259, 305
Molecule formation 85
Monohydride phase 492
Multilayers 141
Muonium 33, 168

Neutralisation 371
Neutron radiation defects 249
NMR 227, 305

OMVPE 383

Optical band gap 281
Optical recombination 201
Oxygen diffusion 115

p-type crystalline silicon 240
p-type silicon 129
PAC 320, 335
Pair configuration 197
Passivation 45, 335, 361, 545, 553
Passivation of defects 392
Passivation of impurities 397
Passivation of shallow donor states and of deep traps 557
Permeation 85
Phases of adsorbed hydrogen 497
Phosphorus 365, 503, 553
Phosphorus implantation 273
Photo cathode 124
Photoconductivity 351
Photoemission 457, 492
Photoemission yield spectroscopy 503
Photoluminescence 218, 540, 557
Photothermal deflection spectroscopy 269
Picosecond photoluminescence 561
Piezo-absorption 371
Pinning levels 557
Plasma 115
Plasma decomposition 571
Plasma etching 218
Plasma treatment 231
Platelet 197
Platelets 223
Polycrystalline semiconductors 469
Properties, electronic, structural and vibrational 45
Proton-bombardment 285
Protons 188

Reactivation 361
Reactive ion etching 513
Recombination 227
Reconstruction 518
Reorientation kinetics 325
RIE 383

Segregated impurities 469
Segregation 45
Semiconductor surfaces 429
Semiconductors 188
Shallow-acceptor impurities 503
Shallow and deep levels 231
Shallow-donor impurities 503
Shallow impurities 325
Si and GaAs parameters 3
Si(1 1 1) and Ge(1 1 1) surfaces 492
Si surfaces 497
Si–H bond 566
Si–H infrared bands 249
Silicon 124, 155, 197, 223, 320, 335, 361, 365, 518, 545, 553
Silicon carbide 518
Silicon containing hydrogen 249
Silicon single crystal 259
Simulation 129
Si/SiO_2 interface 469, 507
Spectroscopic ellipsometry 497
Staebler–Wronski effect 181
Stretched exponential relaxation 69
Stretching vibrations 487
Structural and dynamical properties 98
Structure 305
Structure change 481
Supermolecular complex 259
Surface desorption 105
Surface passivation 523
Surface reactions 45, 481
Surface stoichiometry 481
Surface structure 481
Surface vibration 447

Theoretical methods 168
Theory 21
Thermal annealing 269
Thermal desorption 269
Thermal stability 417, 492
III–V compounds 371
III–V compounds surfaces of 457
III–V semiconductor surfaces 436
Transmission electron microscopy 285

Ultraviolet photoelectron spectrum 436
Unintentional hydrogen 383

Van Wieringen and Warmoltz expression 85
Vibration modes 371
Vibrational frequencies 295
Vibrational spectroscopy 240, 325

Zinc doped GaAs 135
